About this item

- AITRIP ESP32 CP2012 USB C (Type-C) core board, it has 38 pins and more features than a 30-pin module. Narrower width, can be connected to the breadboard very well.
- ESP32 integrates antenna, switches, RF balun, power amplifiers, low noise amplifiers, filters and power management modules. With 2.4GHz WiFi+Bluetooth Dual-mode, support STA/AP/STA+AP mode, universal AT command, easy to use.
- The esp32 breakout board can expand one GPIO pin of esp32 development board to 2,ESP32 Breakout Board GPIO 1 into 2 for 38PIN No Mounting Hole Version ESP32 Development Board
- The expansion board is a double-layer board. One pin is wired on both sides. Therefore, the circuit is stable and highly reliable, and there will be no poor circuit contact and unstable signal transmission. Only compatible with 38 pins Narrow and No Mounting Hole Version esp32 development board, ref asin: B0B764963C; B0B764YL3J B0B12822SF;B09DPH1KXF; B09DPGMZR9
- Package: 3PCS ESP32 ESP-32D ESP-WROOM-32 CP2012 USB C 38 Pin WiFi+Bluetooth Dual Core Type-C Interface ESP32-

Warranty & Support

Amazon.com Return Policy: You may return any new computer purchased from Amazon.com that is "dead on arrival," arrives in damaged condition, or is still in unopened boxes, for a full refund within 30 days of purchase. Amazon.com reserves the right to test "dead on arrival" returns and impose a customer fee equal to 15 percent of the product sales price if the customer misrepresents the condition of the product. Any returned computer that is damaged through customer misuse, is missing parts, or is in unsellable condition due to customer tampering will result in the customer being charged a higher restocking fee based on the condition of the product. Amazon.com will not accept returns of any desktop or notebook computer more than 30 days after you receive the shipment. New, used, and refurbished products purchased from Marketplace vendors are subject to the returns policy of the individual vendor.

Product Description

ESP32 Breakout Board Specifications:

Size: 7.8 * 6.3 * 1cm

PCB material: high quality FR-4 material

PCB layers: 2 layers

PCB thickness: 1.6mm

Pads: tin plated

Note: Only compatible with 38 PIN and No Mounting Hole Version ESP-WROOM-32 development board

ESP32 Description:

This ESP32 CP2012 USB C development board supports STA/AP/STA+AP working modes, bringing you a lot of convenience.ESP32 development board integrates antenna switches, RF balun, power amplifiers, low noise amplifiers, filters and power management modules. The ESP32 integrated with Antenna switches, RF Balun, power amplifiers, low-noise amplifiers, filters, and management modules, and the entire solution occupies the least area of PCB. 2.4 GHz Wi-Fi plus Bluetooth dual-mode chip, with TSMC Ultra-low power consumption 40nm technology, power dissipation performance and RF performance is the best, safe and reliable, easy to extend to a variety of applications.

Package includes:

3x ESP32 CP2012 USB-C (Type-C) Development Board Module

3 xESP32 Breakout Board

Reliable esp32's

Reviewed in the United States on January 31, 2026

Size: ESP32 Type C Dev Board with Breakout Board 2Sets **Verified Purchase**

These are capable and reliable boards and the breakouts are great for prototyping. I've even included the breakout in the device when I'm expecting to change or upgrade the setup. They're cheap enough to just get a new one. I've had 4 of these boards and the all worked great.

Worked but can't power from 5v pin, ONLY USB

Reviewed in the United States on August 1, 2025

Size: ESP32 Type C Dev Board with Breakout Board 3Sets **Verified Purchase**

Boards are handy, but you have to power through USB. All 3 boards would work fine vis USB power, but when trying to power in project through the 5v pin, they constantly rebooted. Had to solder a cheat wire onto the USB VBUS to get the project to work. Other than that its very handy to have screw terminals. I understand this is a common design flaw in these boards.

Extremely handy for prototyping and even building full components

Reviewed in the United States on February 22, 2026

Size: ESP32 Type C Dev Board with Breakout Board 3Sets **Verified Purchase**

I've really enjoyed working with these. Initially, I thought I would just be using them in place of breadboards for prototyping new smart home devices, but I've started to just use them for building things. I have a bunch of ESP-32s that I am now considering trying to find these pre-mounted headers and screw terminals for because this is just so easy to use if you don't need to solder intermediary components (and even when you do in some cases).

Jeff I.

not a great board

Sponsored

Reviewed in the United States on February 6, 2026
Size: ESP32 Type C +Purple Breakout Board 3Sets **Verified Purchase**

the included esp-32 (not wroom like the title and image show) has no psram what so ever. if you are wondering they are nodemcu v1.1 models. even the 1.3 model is considered an old version of that board.
