Customer reviews

4.2 out of 5

88 global ratings

5 star 69%

Customers say

Customers report that the LED lights work well for running light projects. However, the brightness receives mixed feedback, with some finding them bright while others say they are dimmer than expected. Moreover, the color accuracy is also mixed, with several customers noting they are not purple/black lights as expected.

Great value, and seller

Reviewed in the United States on October 28, 2025

Color: Purple **Verified Purchase**

Sponsored

Over the year i have bought thousands of leds from manysellers. I tested this sellers LEDs (each and every one) and they all were to specifications and functioned as they should. They were bright and UV color was strong. Such a good price I ordered more than one.
I have made devices only to find the led I got from OTHER sellers weren't all the same.
This seler is on my favorite list.

Good value

Reviewed in the United States on January 10, 2026

Color: Purple **Verified Purchase**

Good value, reasonable for making prototypes. It would be great if there's a built-in resistor.

Helpful Report

Ray

Bright, easy to install, worked great for my running light project

Reviewed in the United States on April 26, 2024

Color: Purple **Verified Purchase**

I wanted to start out by saying I really did not need 100 leds for this particular project. But for the price, you just cannot go wrong. They worked great for my automotive running light project. They are very bright for UV (purple) 5mm leds. They are mounted behind lenses so they are not exposed to the elements. I did need to solder resistors to run them on a 12v setup in series, but that was already anticipated. (Resisters were another Amazon purchase). I am very pleased with my purchase. Now I have plenty more Leds for other future projects and I'm sure I will have many more Amazon purchases in my future. Thank you

Not bright at all

Reviewed in the United States on December 25, 2024

Color: Purple **Verified Purchase**

Very dim and has no effective ultraviolet output at all, even at very short range (like right on top of things)

Bright light at a specific color

Reviewed in the United States on December 29, 2023
Color: Purple **Verified Purchase**

Low power consumption and at a color that fluoresces certain materials

Bright

Reviewed in the United States on November 8, 2024
Color: White **Verified Purchase**

Used to replace burned out leds for garden solar lights. One thing noticed about them is they slowly lose their brightness after a summer season. Once the led is replaced with a new one it's bright again.

They work not real brite.

Reviewed in the United States on March 6, 2023
Color: Purple **Verified Purchase**

I was looking for high output uv leds. Need to cure uv paint. It will take 50 of theese in a panel to do the job.
